

Victorian bay window

The project

GMG was approached for their expertise in traditional properties to restore a Victorian bay window.

Approach

To replace the Victorian bay window, we undertook leadwork which included specialist treatment to deal with the wood rot - wet and dry. Our team then reinstated the original timber and Code 8 lead details.

Outcome

The work was completed in an efficient manner and within budget and on time. Our team was delighted to share the completed transformation with the client.

The refurbishment work will ensure it is future-proofed for years to come.

CLIENT

Private client

SCOPE

Replacement of Victorian bay window

SKILLS

Traditional property restoration. Roofing. Waterproofing
