

Dalkeith home refurbishments

Midlothian Council

The project

A major refurbishment of four-in-a-block flats and other residential properties in Dalkeith on behalf of Midlothian Council.

Approach

Our specialist teams were on site at the premises in Musselburgh Road and James Lean Street, Dalkeith. The programme of work involved rendering upgrades, roof and drainage repairs, chimney re-rendering and gutter clearing.

Throughout the project, our team facilitated open communication with the residents, sub-contractors and council to improve the workflow.

Outcome

The completed refurbishment supports energy-saving home improvements and demonstrates our commitment to help residents live in safe, dry homes.

The project provided valuable instruction and experience for our team of apprentices. As a company, GMG is committed to providing on-the-job training of apprentices to the highest standards and broadening their skills to improve their employability and life chances.
